

SIREX® BM-1095**DESCRIPTION**

A mineral loaded PVC sound barrier mat with wear resistant skin and hessian substrate for added strength and dimensional stability.

APPLICATION

Designed to improve the sound insulation of existing panels of metal, wood, plastic etc. at all frequencies. The mat is normally fixed in intimate contact with the original panel. These barriers are particularly effective in overcoming coincidence dip resonance found in stiff lightweight composites such as plywood sheets and hollow core panels. **SIREX® BM-1095** can also be used as a free hanging acoustic curtain.

PHYSICAL PROPERTIES

| | |
|---|------------------------------|
| Colour | black |
| Superficial Weight | 15.0 kg/m ² |
| Nominal Thickness* | 7 mm |
| Breaking load | 350 N/25 mm |
| Flammability | FMVSS 302 Self-extinguishing |
| Operating Temperature Range (Static) | -30° to + 65°C |

* *Materials are normally made to weight tolerances.*

This information is based on our general experience and is given in good faith but, because of the many factors outside our knowledge and control which may effect the product, no warranty is given or is to be implied with respect to such information.

Any information in this document is presented to our best knowledge. All properties are based on individual values and should be considered as a guideline, not as a specification. They are in no way legally binding. Further are applicable the general terms of payment and delivery of Imbema Holland B.V. and her affiliated companies, in which, among others, has been taken a restriction of liability. They are registered on October 15th, 1982 at the district-court in Haarlem, The Netherlands. These can be sent on demand.
